Considerations

Details

Access, Permissions and Security:

Open to the public, there might be a cricket game as they usually do those on Tuesdays, however this is early in the morning so the likelihood of this happening is low

Access to power, Lighting, charging points:

There will be natural light as we are outside and there are no access points to power so we will bring spare batteries if they are needed. We will have 2 cameras to film B-roll with Dan

Noise and sound quality on location:

We will be away from any main roads so there won't be traffic noise, there might be noise from other people, however we will mute the audio.

Set dressing and props:

The only props we would need is a water bottle for Dan to drink from as he will be doing some training B-roll, like running and other exercises

Weather conditions:

The weather on the day would most likely be misty and a bit rainy so if we do film tomorrow it will either be cancelled or we will film in misty conditions

Welfare of Cast and Crew on Location:

- First Aid
- Emergency procedure
- Food and Drink
- Toilets

We will decide whether or not we will film B-roll with Dan, if the weather is good or bad. There are very few health hazards at the clange so if we do film there, there won't be any problems.

THE ONLY ISSUES WITH THE B-ROLL SHOOT IS RAIN
