

BCFC vs Stoke Shot List

- B-roll of the media entrance, start recording as I'm coming up to the media entrance along the outside of the stadium with the food trucks along the left.
- As I enter the media entrance and get my purple zone pass, as I pick it up, increase the speed in edit and show me taking the kit to the cupboard in the players lounge and me entering the press room, with a close up on the "press room" sign.
- Set up the GoPro to show a timelapse of me editing in the press room
- Try and get score predictions from other people who arrive in the press room
- Record me setting up the kit I will be using to record the game (record a V/O and explain what I'm using and why)
- Put the chest strap back on and record my way to pitch side and finish this bit with me putting the tripod with my camera down
- Set up the GoPro so it can see all the home stands as they fill up with fans (timelapse)
- Set up the GoPro at a low angle so it can see me operating the camera from waist up with a stand in the back
- When it's half time, go over to the home end and get some fan thoughts of the first half
- Change the GoPro angle of me to an over the shoulder shot with the pitch in the back (for both angles of me, record for around the time it takes for my camera to stop)
- When the game is over, get another timelapse of people leaving the stadium
- Finish the game vlog with a fade to black when the stadium empties

BTS VLOG

- Once the game is over, put the chest strap back on and walk back to the press room to show us offloading the footage and putting it on my hard drive
- Finish with an outro, thanking people for watching. (this is for the BTS vlog only)
